

Night Calls

HAERTS

C'mon and play the Music
Don't you just leave this way
Said that you know the music
Know it another way

I will run for you, I will run for you, I always will

C'mon and say it's over
Maybe in another life
You never knew just how to
Love me in the morning light

I will run for you, I will run for you, I always will
I will run for you, I will run for you, I always will

You had a song inside you
You never touched the ground
Nobody there to guide you
Nobody but the sound

I will run for you, I will run for you, I always will
I will run for you, I will run for you, I always will
I will run for you, I will run for you, I always will

When the night calls
When the night calls
When the night calls
When the night calls
When the night calls
When the night calls

C'mon and play the music
Don't you just leave this way
Said that you know the music
Know it another way

C'mon and play the music
C'mon into the night
Don't ever let them have it
Don't ever let it die

I will run for you, I will run for you
