

Turn It Around

HAERTS

Here with the asoles in the sky
Another spill like a storm blowing by
In other words, in other words I will try
A lover's sleep with their love and what lies

And you can turn it around
To see the right from the wrong
And you can turn it around
You can turn it around

Here with the magic, with the burden in tears
You missed the sun underneath my fears
You touched the book, touched it, it goes wrong
Into your arms I fall, I fall all along (all along)
Don't know the truth that I'm not gon' regret
Don't know the voices inside my head (inside my head)
Well did you not forget my breath
The beat goes on inside my chest

And you can turn it around
To see the right from the wrong
And you can turn it around
You can turn it around

And you can turn it around (turn it around)
To see the right from the wrong (see the right from the wrong)
And you can turn it around (turn it around)
You can turn it around
Don't know the truth I don't know (you can turn it around)
Don't know the voices inside my own head (to see the right from
the wrong)
Well did you not forget my breath (you can turn it around)

The beat goes on inside my chest (you can turn it around)...
