

One Day

HAEVN

I'm gone away in the morning
To see the world through different eyes
The further I get the closer I'll be
In every city and every sky

I'll lift the world from my shoulders you know
And I'll see so many sights
I will taste forbidden flavors
And I will dance till the sun will rise

In the sunsets glow
And the star lit nights
I will travel far, travel light
And the burden's gone
No ties left to bind
I've decided to leave you behind

Give me solitude
Give me time
Give me all the strength to uncover a new life
Give me solitude
Give me time
I will find my way to let go of what's behind

I'll roam the earth when the sun goes down
And I'll travel through night
I'll see a reflection of the ghost I was
In every land that passes by
Maybe I'm scared
Maybe I'm lost
But I'm far enough to find
That in the space that's grown between us
I'm gonna start another life

In the sunsets glow
And the starlight nights
I will travel far, travel light
And the burden's gone
No ties left to bind
I've decided to leave you behind

Give me solitude
Give me time
Give me all the strength to uncover a new life
Give me solitude
Give me time
I will find my way to let go of what's behind

One day you'll all understand it
One day you'll understand
One day you'll all understand it
One day you'll understand
One day you'll all understand it
One day you'll understand
One day you'll all understand it
One day you'll understand

Give me solitude
Give me time
