

Till The Morning

HAEVN

I spend my days alone without you
In darkness, lost and not awake
I try to stay afloat in my way
But it's hard when you found solace in another place

Can you bring me to your hideout?
Can I hear your silent calling?
Can we dance with the lights off?
Can you give me till the morning?
Can you give me till the morning?
Can you give me till the morning?

I hear you, but I'm in doubt again
I don't feel you even when you're around
You give me all of your words but in the end there's nothing said
I'm gonna need some time to work this out

I'll be here in my hideout
I can hear your silent calling
We can dance with the lights off
I can give you till the morning
Maybe you've been blinded
Never saw my final warning
We can dance with the lights off
I will hold you till the morning
I will hold you till the morning
I will hold you till the morning

Let us stay in this hideout
Even till the night is falling
We'll keep dancing with the lights off
We can dream until the morning
Can dream until the morning
Dream until the morning
