

## Feel It When Convenient

Hail the Sun

Stark compunction  
Found salvation  
Forged contrition  
Shame cessation

Steal it from me  
I should have known  
Make it hurt then leave it alone  
My moral operating system is off  
The incapacity to care is so strong!

Send help  
Save our souls  
I need something to go wrong

Fractured system  
All of my roots are dead to me  
Detach from me  
Severed all the way  
All of my wounds are scars to be  
The depth of me  
So long swan song

Listen, it's not your fault  
I've dragged some then been dragged along  
My moral operating system is off  
My incapacity to care is so strong!

When I learn a new part of me  
I forget something else  
On the set of who I've become  
I always wanna look back  
Always wanna stall  
When I show different parts of me  
I don't sleep where I live  
Leave debris when I act alone  
Thinking in the moment  
Consequences form

Send help  
Save our souls  
I need something to go wrong

Fractured system  
All of my roots are dead to me  
You're dead to me  
Severed all the way  
All of my wounds are left to be  
The death of me  
(So long)

Fractured system  
I just want you to die for me and detach from me  
Severed all the way  
All of my wounds arrange to be  
The depth of me
