

# Everytime You Close Your Eyes

Halestorm

Once upon a moment in my mind  
Didn't know just what I would find  
We touched so close before  
Walked in and out through destiny's door  
And suddenly you were mine  
But now we see beyond the stars  
It's not so very far tonight  
We bare our souls and  
For the first time  
We'll see just who we are, cause

Everytime you close your eyes  
Can you see my face in the dark  
Can you feel the burning passion  
Igniting from a spark  
Does it take a while for you to see  
Or does it come as no surprise  
This heart beats for you  
Everytime you close your eyes

Time stands still when I'm holding you near  
You put an end to my trail of tears  
Forever's not out of sight  
If you just take my hand tonight  
And let me strip all your fears  
And after pain and fight  
The dream has been reborn  
And through the coldest night  
We'll let emotion's fire keep us warm, cause

And where the eagles dare  
That's where our spirit flies  
I need to look no further when I see my face  
It's there in your eyes cause.

Everytime you close your eyes  
Can you see my face in the dark  
Can you feel the burning passion  
Igniting from a spark  
Does it take a while for you to see  
Or does it come as no surprise  
This heart beats for you  
Everytime you close your eyes  
Everytime you close your eyes  
Do you call my name in the night  
Do you wonder where I am  
When you're turning off the light  
Do I ever cross your mind  
As emotions start to rise  
I'll always be with you  
Everytime you close your eyes  
Everytime you close your eyes  
Everytime you close your eyes  
I'll be with you everytime you close your eyes
