

We were waltzing around each other
I followed your lead
That's all I could see
I got stuck in a holding pattern
Thought you'd never leave
For a different world than me

But when you stepped away and we got our space
Oh, your perspective of us all changed
And my gravity is just too weak
To pull you closer to me, so

Call me a planet
Your personal moon
No, I don't understand it
But I still revolve around
Only your orbit
One that I didn't choose
No, I don't understand it
But I still revolve around
You-ou
You-ou
You-ou

Funny I don't know what you're doing
Or what street you're on
Your new favorite song
But the old us would spend our Fridays
Looking at the stars
Are you doing that wherever you are?

When you stepped away and we got our space
Oh, your perspective of us all changed
And my gravity is just too weak
To pull you closer to me

Call me a planet
Your personal moon
No, I don't understand it
But I still revolve around
Only your orbit
One that I didn't choose
No, I don't understand it
But I still revolve around
You-ou
You-ou
You-ou
