

One By One

Half Me

Your words are hollow
But they cut like a knife
Building your empire
Derailing your own life

A twisted tale
Deceit in your eyes
Your mighty ego
Casting shadows in the night

Your eyes are burning
While your heart is cold
But when tides are turning
You're the one that stays alone

One by one
They'll fade away from you
When the mask is falling apart
One by one
When your self worth is gone
Could you deal with it

Say what?!

Are you a narcissist?
Or just a selfish fucking bitch
You are a narcissist
You fucking bitch!

You are the best of friends
As long as it serves your cause
You tell another lie
I'll break your fucking jaw

One by one
They'll fade away from you
When the mask is falling apart
One by one
When your self worth is gone
Could you deal with it

Your words are hollow
But they cut like a knife
Building your empire
Derailing your own life
