

Salt

Half Moon Run

Somehow
You got in
When my heart wouldn't let nobody in
It's easy to forget it
When you're comfortable and tethered
But I know now I been found

I learned to sing about you
In the winter's two year season
It's a damn fine time to look on
Now I speak to you in secrets
You keep me in your spirits
When there's a cold wind blowing at the door
Uh-huh

But if you set me up
I'll fall right down
Don't you know that you're my
Salt of the Earth

Passing through feeling
The other side has taken to me
I'm not sure how long I can hold on
Where everybody's dancing
Like spindrifts in oceans
We go down, down, down, down, down

And if you set me up
I'll fall right down
Don't you know that you're my
Salt of the Earth
And if you set me up
I'll fall right down
Don't you know that you're my
Salt of the Earth

Uh-huh
The light of the world
