

Long Drive

half•alive

Wake up from a dream
Ripping at the seams
Barely holding on
I could use a long drive
I've been pulling every string
Looking for the end
I could use a friend
I could use a long drive

I get scared
Outside the lines
I latch onto
Any comfort I find
I get scared
Without a frame
Without heavenly
Tethering
I slip far away

You can find anything
Anything that you want
If you want
You can go looking and you'll find it
It's all there
You can find anything
Anything that you need
If you need
You can go looking and you'll find it
It's all there
It's all there
It's all there

Look what I've become
Trying to be someone
I wander through the woods
Looking for the good life
We all listen to the hum
Hearing what we want
I wonder if I could
Recognize the good life

I get scared
Outside the lines
I latch onto
Any comfort I find
I get scared
Without a frame
Without gravity
To hold me down
I slip far away

You can find anything
Anything that you want
If you want
You can go looking and you'll find it
It's all there
You can find anything

Anything that you need
If you need
You can go looking and you'll find it
It's all there
You can find anything
Anything that you want
If you want
You can go looking and you'll find it
It's all there

You'll believe anything
Anything that you'll need
To believe
If you need
Something then you'll find it
It's all there
