## Wrath Of God

White swords of blinding razor light blast round the earth Validating with immortal strength courage of the brave From the aftermath of dust and flames resilience soars Upon the searing light's reflected blade that guards and saves

The dark sky the victims The air is full of vengeance From now on no mercy The wrath of God reins on you

These monuments of power and steel carved in each soul Stand forever indestructible for all mankind The face of mighty nations liberty in stoic resolve For all the hated evil that men can do will be avenged

The dark sky the victims The air is full of vengeance From now on no mercy The wrath of God reins on you It's over you're wasted Now you're incinerated In hell I'll meet you And once again defeat you

And though the light is dimmed to black someday Inside it burns a raging fire to virtues endless war And freedom's cause

The dark sky the victims The air is full of vengeance From now on no mercy The wrath of God reins on you It's over you're wasted Now you're incinerated In hell I'll meet you And once again defeat you
