

## Remember We're Alive

Halifax

She bites my lip and I want more, she's breathing  
Pulls my hips down to the floor, she's pleading

Silhouette on TV light  
The grope into the light  
We forgot about the time!

These moments have a way of slowing down  
In everything that makes us come unwound  
So lose yourself inside, remember we're alive  
And hold onto the things we are right now

She smokes as we lay intertwined, our hearts pound  
Sweat and nicotine combine, no more sound

See the red of morning light  
The sun returning life  
We forgot about the time!

These moments have a way of slowing down  
In everything that makes us come unwound  
So lose yourself inside, remember we're alive  
And hold onto the things we are right now

Love, leaves some caught up and stranded  
But trust me, I'll be there for the fight!  
Some souls live life like they planned it  
Some just do whatever feels right  
But tonight, if it feels right  
Don't let go!

These moments have a way of slowing down  
In everything that makes us come unwound  
So lose yourself inside, remember we're alive  
And hold onto the things we are right now

These moments have a way of slowing down  
In everything that makes us come unwound  
So lose yourself inside, remember we're alive  
And hold onto the things we are right now  
These moments have a way of slowing down
