Hall & Oates

I turned around and you were standing there More than a little high More than a little crazy So beautiful I had to stare And I knew you had the power to change me Scarlet woman, you've come for me Your timing's great, 'cause I've been Waiting so long The only thing I want to say Now that you've got me, please-Don't change my life You know I love you but I hate your friends They got dollars but they ain't got sense If the time comes and you go away I hope I've changed and yet stayed the same Scarlet woman you've come to me Your timing's great 'cause I've been Waiting so long Only thing I want to say Now that you've got me, please-Don't change my life
