

# Burn It Down

HammerFall

We spill our blood in foreign land  
Forgotten by the prophet's hand  
Where every man envies the dead  
A place forsaken by the sun  
Where darkness reigns for everyone  
The rivers run in crimson red

We must fight and defend to make it right  
Ignite the flame, it's burning bright, so bright

Here we are, the mighty opponents  
Here we stand with the wind in our hair  
You promise heaven, we give hell  
Unchain the beast, unleash the champion  
Fire raging - burn it down

The fury on the battlefield  
A force that I have never seen  
The highest price we have to pay  
For many monsters we have slain  
Awaken, to be dead again  
Oh praise the Lord on judgement day

You feed on pain  
Self-destruction and disdain  
The time has come, Armageddon, now break the chains

Here we are, the mighty opponents  
Here we stand with the wind in our hair  
You promise heaven, we give hell  
Unchain the beast, unleash the champion  
Fire raging - burn it down

Out there searching for the truth  
Your ball and chain  
A wildfire in its youth  
The bringer of pain

We must fight and remain to make it right  
Protect the flame, it's burning bright, so bright

Here we are the mighty opponents  
Here we stand with the wind in our hair  
You promise heaven, we give hell  
We will succeed, unleash the champion  
Fire raging - burn it  
Down to the ground, down to the ground  
Let's burn it down  
Down... burn it down
