

Capture The Dream

HammerFall

Trying to shut me down since the beginning
But my dream's my dream and the will to fight is strong
They've been trying to undermine me right at my own grounds
But the fire inside's been my virtue all along

Now or never (Be a champion)
Find the rhythm within (Your spirit)
Let the future begin (Don't fear it)
When your story is told, the truth will unfold
So capture the dream

There is a choice in life, which way will you go?
Come to rest, or step into the great unknown
When the future seems too bleak, don't look there for answers
Look inside yourself, be true to you alone

Feel the music (Be a champion)
Find the rhythm within (Your spirit)
Let the future begin (Don't fear it)
When your story is told, the truth will unfold
So capture the dream

Find the rhythm within (Your spirit)
Let the future begin (Don't fear it)
When your story is told, the truth will unfold
So capture the dream

Find the rhythm within (Your spirit)
Let the future begin (Don't fear it)
When your story is told, the truth will unfold
So capture the dream

Find the rhythm within (Your spirit)
Let the future begin (Don't fear it)
When your story is told, the truth will unfold
So capture the dream

Oh, here I am after all these years still reaching for the stars
Here I am, like a raging outlaw shining with my scars
Here I am, through the winds of change, through purgatory flames
Here I am, here I am, here I am, here I am!
