

April Song

Handsome Ghost

More snow cover down on my luck
We lost each other between the ruts
And I've been here before
That's what's been holding me back

I'll just wait for the summer so far away
These shape shift lovers don't seem to stay
And I've been here before
Dragging myself round the track

Yeah, I've been here before
And that's what's been holding me back

I'm just worried bout forever
And wondering if I miss her pretend
So I'll keep driving through the dawn break
And fighting against the same fate again

And if I come to a crossroads frozen in place
It's all that I don't know and what's slipped away
But I've been here before
And that's what's been holding me back

I'll just wait for the summer slowly it comes
I've got to remember the cleanse of the sun
But I've been here before
Drowning myself in a glass

Yeah, I've been here before
And that's what's been holding me back

I'm just worried bout forever
And wondering if I miss her pretend
So I'll keep driving through the dawn break
And fighting against the same fate again

I'm just worried 'bout forever
And wondering if I miss her pretend
So I'll keep driving through the dawn break
And fighting against the same fate again
