

Even On The Darkest Days

Handsome Ghost

Late late in the evening
Early in the morning
Or some other time

Oh people are talking
Words they are falling
Out on a line

So where
Where are my good friends lord when I left them
Is anything mine

And what
What of that woman what is she doing
I'm sure she's just fine
Well I came to this place in the heat
When the sun won't forgive you it beats

I'm still on my feet
Though I stumble and sway
This world is so sweet
Even on the darkest days

Then drinks
Drinks on my table apartment is packed full
With strangers I've met

Look
Look how they love me they put their hands on me
And sleep in my bed

I'll run
Run to that old house tired now and worn out
I'll think to myself

All
All of these people no they don't need you
You've gotta get out
Well I came to this place in the heat
When the sun won't forgive you it beats

I'm still on my feet
Though I stumble and sway
This world is so sweet
Even on the darkest days
