

Heaven Isn't Long for You

Handsome Ghost

Sky true blue
Time doesn't move
I've been living this way for a while

Five star meals
And baseball fields
Well, pour a drink and we'll kill some time

Down to the river bend
Down there I couldn't swim for my life
Dive deep the highest height
Look now I'm swimming the butterfly

And in the evening glow
The day is slow to end
Not a cloud for a miles and what a time it has been

But now I wanna feel the rain
I wanna feel the rain again

Wake up late
Sun on my face
How could any man ask for more

It might sound strange
I might be deranged
But I think I miss the pain from before

And in the evening glow
The day is slow to end
Not a cloud for a miles and what a time it has been

But now I wanna feel the rain
I wanna feel the rain again

But now I wanna feel the rain
I wanna feel the rain again
