

Shallow City

Handsome Ghost

Let it spill into the sidewalk
Let the rhythm run you wild
Mission living where the lights burn loud
The vision in your head right now

But I could be the one in the jet black jacket
Call it what you want what I want you have it
You could be the one in the shallow city
Everything we've done, I want you with me

Let sun never start
Let's live in the dark
It's all we ever had, all we lost

Two ghosts in the street
Move closer to me
It's all we ever had, all we lost

So it's back against the concrete It's back into the bar
Talk it over in the weekday dark
You'll feel it when the lights turn on
But I could be the one walking slowly towards you
You'll be looking back, it cuts me right through
I could be the one in the shallow city
Everything we've done, I want you with me

Let sun never start
Let's live in the dark
It's all we ever had, all we lost

Two ghosts in the street
Move closer to me
It's all we ever had, all we lost

So how's it coming home to a house this empty I'm packing up the
past fill the walls up slowly
