

Every Night

Hannah DiAmond

I know you like the way that I look
And it looks like I like you too
You know I do
I like the way you know
That I like how you look
And you like me too
I know you do
I see you look at me
And I know that you think
You like what you see
I want you too
I think the time is right
And I want you to see
How good it would be
For you and me

I want to see you every night
And feel your heart beat next to mine
I want to see you every night
We'll find a way to make it right x2

I know you like the way that I look
And it looks like I like you too
You know I do
I like the way you know
That I like how you look
And you like me too
I know you do
I see you look at me
And I know that you think
You like what you see
I want you too
I think the time is right
And I want you to see
How good it would be
For you and me

I want to see you every night
And feel your heart beat next to mine
I want to see you every night
We'll find a way to make it right x2
