God Created The World

Hans Theessink

God created the world – and he created man
Man created evil – spread it all over the land

That day in September – airplanes rented the air
Burst into that tower – destruction everywhere
Killed innocent people – fire all around
They were trapped in that building as it came tumbling
down

God created the world – and he created man…

Now the politicians they all gathered round
It's the axis of evil – let's hunt them down
Waste their arms of mass destruction – we know they
must be around
Chase that dictator – drop a bomb on his town

There'll be casualties on both sides – the prize to pay
to be free
Bring them civilisation – install democracy
We'll teach those terrorists a lesson – they can run
but they can't hide
We don't take no messin' – we know wrong from right

God created the world – and he created man…

Have you got a solution mister president?
Eye for an eye – or a secret masterplan?
People killing people – history all over again
Hatred escalating – it's getting out of hand

You can read your bible – read your koran
Where do you read about terror – fighting a distant
land?
If you want your peace 'n freedom – don't have to go so
far
There's lots of work a-waitin' in your own backyard

God created the world – and he created man…
