Lonely Days & Lonely Nights

Hans Theessink

Lonely days and lonely nights Life's been full of misery I've been crying, crying, crying Since you walked out on me Woman, one day you will know You gotta reap what you sow I've been watching you baby Tears in my eyes See you laughing pretty woman But some day you'll be crying You just wait and see Someone will hurt you like you're hurting me You've been messing with my heart Now you're tearing me apart You've been twisting me around Put me up and put me down All you wanted was a toy A dancing puppet on a string Used me for your fun and joy Then you dropped me just like nothing One day, you just wait and see Someone will treat you like you treated me You've been messing with my heart Now you're tearing me apart You've been twisting me around Put me up and put me down Lonely days and lonely nights You've been messing with my heart Now you're tearing me apart You've been twisting me around Put me up and put me down
