

Better Days

Hanson

You and me
We're gonna make it together
Just wait and see
You won't even remember
The struggles in search of our

Better days
Better days than before
Better days
Better days are coming

I concede
We've had a few misadventures
We fight and seek
Just trying to live up
To our potential
But I believe
Even the hard times
Will one day resemble

Better days, better days are coming
Better days than before
Better days, better days are coming
Better days are coming

What we face
Will one day be inconsequential
To take it through
Some days it may feel like we're
Running out of time
The jump from fantasy to reality can be
Hard to define
Better days are coming

Better days, better days are coming
Better days than before
Better days, better days are coming
Better days are coming
Better days, better days are coming
Searching for a better day
Better days, better days are coming
Better days, better days are coming
Searching for a better day
Better days, better days are coming
Better days are coming
