

Up All Night

Hanson

Up all night, working on my master plan
Cause this condition nine to five is going nowhere fast
In the morning, I'll escape to what is left of my bed
And sleep all day, cause I've been up all night

I want to wake up when the sun goes down
I want to be the only show in town
I want to spend my days in magic pants
Just want to shake things up, ooh

Up all night, working on my master plan
Cause this condition nine to five is going nowhere fast
In the morning, I'll escape to what is left of my bed
And sleep all day, cause I've been up all night

Seems the whole world revolves around the sun
The man on the moon is my new number one
Change of perspective, change my point of view
And everyday I make it up, make it up, make it alright now

Up all night, working on my master plan
Cause this condition nine to five is going nowhere fast
In the morning, I'll escape to what is left of my bed
And sleep all day, cause I've been up all night

I gotta change my point of view
I don't know what's it's coming to, ooh ooh

Up all night, working on my master plan
Cause this condition nine to five is going nowhere fast
In the morning, I'll escape to what is left of my bed
And sleep all day, cause I've been up all night
