

## You Know Where We All Belong

Hardcore Superstar

You made my heart and soul collide  
You are so fine and full of life  
I said - If you don't know where to go  
Please love come with me

Sit yourself next to my record machine  
You know where we all belong  
Sail on and into my song  
Don't know where we are going now  
Don't know where we've been  
Sailing on and on and away

You came to me like in that song  
Someone special, spirit's goal and on  
If you're feeling lonely now  
Please don't shade a tear  
I'll be with you at the end of this song

You know where we all belong  
Sail on and into my song  
Don't know where we are going now  
Don't know where we've been  
Sailing on and on and away
