

80's Moment

Hardline

You got in my head you stepped on my soul
Drove me to places on a dead end road
You took me for this when I gave you that
Kept me in the web of your tangled trap

Something's always well deserved
While dust settles on your world (on your world)
Don't work like that not even close
From your head down to your painted toes

Hey you can look at me centerfold
Yea that's me

Bottle it up and drink it away
It's love until the moment's gone
Fire it up and smoke it away
It's love until the moment's gone

You got in my head and what has it done
I slipped inside of a time bomb
What we've been thru the cool and the bad
Begging with the hands of a hungry rat

Something always on your nerves
But this time you threw a hell of a curve (hell of a curve)
Don't work like that not even close
From your red lips to designer clothes

Hey you can look at me
Settle for more than me

Bottle it up and drink it away
It's love until the moment's gone
Fire it up and smoke it away
It's love until the moment's gone

Oh I got your number
It's all written on me
What are you making of me

Bottle it up and drink it away
It's love until the moment's gone
Fire it up and smoke it away
It's love until the moment's gone

It was good while it lasted
Taking that piece of me
Bottle it up and drink it away
It's love until the moment's gone
