

Like That

Hardline

Here we are, alone, and desperate
And how have we come to this, weak, and defenseless
We have been here before
It comes and it goes and comes some more

Never wanted it to be like that
Never thought that it would be like that
Never felt like truth or fact I know
It never should have been like that

It never should have been like that

Here we stand, weak, and lifeless
How have we come to this, place, of relentless
We have been here before
Shattered, bitter, begging for more

Never wanted it to be like that
Never thought that it would be like that
Never felt like truth or fact I know
It never should have been like that
Not like that

What in the world has happened
To why it feels so wrong
Chasing after it all
Never like that before

Never wanted it to be like that
Never thought that it would be like that
Never felt like truth or fact I know
It never should have been like that

Never wanted it to be like that
Never thought that it would be like that
Never felt like truth or fact I know
It never should have been like that

It never should have been like that
