Thinking About You

I wake up smiling every morning Yeah, I don't mind sleeping alone People ask me if I don't miss you But I ain't been thinking about

All the nights we've spent together And how your skin felt on my skin And I'm just calling to let you know Uuuh, I ain't been thinking about you

Been thinking about you Been thinking about, thinking about, thinking about I ain't been thinking about you Been thinking about you Eeen thinking about, thinking about I ain't been thinking about you

I go out every single evening I drink a little bit too much People ask me if I don't miss you But I ain't been thinking about

Nights when we went out together When it was us against the world No, I'm just calling to let you know that Uuuh, I ain't been thinking about you

Been thinking about you Been thinking about, thinking about, thinking about I ain't been thinking about you Been thinking about you Eeen thinking about, thinking about I ain't been thinking about you

I ain't been thinking about you I ain't been thinking about you

No, I'm just calling to let you know that Uuuh, I ain't been thinking about you

Been thinking about you Been thinking about, thinking about, thinking about I ain't been thinking about you Been thinking about you I ain't been thinking about I ain't been thinking about you

I ain't been thinking about you
