

Gravity

Harem Scarem

Everything that goes up
Eventually comes down
Tides will rise
So one day I will drown
I'm the mass that's falling to the ground
You're a force of nature
World renowned

Einstein brain and Da Vinci claim
Sir Isaac's laws were sound
And I've found

You're dragging me down like gravity now
The ground's not breaking my fall
You're dragging me down like gravity now
'Til there's nothing left of me
I'm down like
Down like gravity

Galaxies and beyond
A universe of stars
Can't explain
Why I'm from Venus, you're from Mars
If phase reversed
You'd lift me to the clouds
But $e=mc^2$
Without a doubt

Tight ropes fray
No violins play
Sir Isaac's laws were sound
And I've found

You're dragging me down like gravity now
The ground's not breaking my fall
You're dragging me down like gravity now
'Til there's nothing left of me
I'm down like
Down like gravity

You're dragging me down like gravity now
The ground's not breaking my fall
You're dragging me down like gravity now
'Til there's nothing left of me
I'm down like
Down like gravity

You're dragging me down like gravity now
The ground's not breaking my fall
You're dragging me down like gravity now
'Til there's nothing left of me
I'm down like
Down like gravity
