

Swallowed by the Machine

Harem Scarem

We're falling into dystopia
It's crumbling before our eyes
Black mirror reflecting all our lives

Days of judgement upon us
Broken and demoralized
March into the vortex single file

There are wolves at the door
They wanna rip you to pieces
Their hunger grows
With no end in sight

Just don't look down
Or give it air to breathe
Storms and clouds
Will blind your destiny
We all have dreams, we all have doubts
Be careful which you feed
And don't get swallowed by the machine
Yeah don't get swallowed by the machine

When will the rain stop falling
No vision blurring lines
Crushed under pressure doing hard time

There are wolves at the door
They wanna rip you to pieces
Their hunger grows
With no end in sight

Just don't look down
Or give it air to breathe
Storms and clouds
Will blind your destiny
We all have dreams, we all have doubts
Be careful which you feed
And don't get swallowed by the machine
Yeah don't get swallowed by the machine

Just don't look down
Or give it air to breathe
Storms and clouds
Will blind your destiny
We all have dreams, we all have doubts
Be careful which you feed
And don't get swallowed by the machine

Just don't look down
Or give it air to breathe
Storms and clouds
Will blind your destiny
We all have dreams, we all have doubts
Be careful which you feed
And don't get swallowed by the machine
Yeah don't get swallowed by the machine
