

# Understand It All

## Harem Scarem

Into this world we all come alone  
And we'll all be leaving the same way  
To a greater unknown  
And right from the start  
We all played the game  
Yeah we rolled the dice and sacrificed  
For the thrill of the chase

Flying at breakneck speeds  
We're crawling to the end

Oh cause life is a one way ride and nobody survives  
And your backs against the wall  
Will the stars collide, will they all align  
We'll never understand it all  
Yeah souls will fly to the other side  
As they're answering the call  
It's a one way ride and nobody survives  
We'll never understand it all  
Understand it all

Now chaos is born  
And desperate to feed  
You can't fight the human condition  
Chose your misery

Flying at breakneck speeds  
We're crawling to the end

Oh cause life is a one way ride and nobody survives  
And your backs against the wall  
Will the stars collide, will they all align  
We'll never understand it all  
Yeah souls will fly to the other side  
As they're answering the call  
It's a one way ride and nobody survives  
We'll never understand it all  
Understand it all

Oh cause life is a one way ride and nobody survives  
And your backs against the wall  
Will the stars collide, will they all align  
We'll never understand it all  
Yeah souls will fly to the other side  
As they're answering the call  
It's a one way ride and nobody survives  
We'll never understand it all  
Understand it all
