

Wasted Years

Harem Scarem

Under the delusion that I could win
By making the same mistakes again
Now chaos is breeding the opposite, oh no
It's the same old thing we've been sold

When there's no going back
No going home
They'll lead you on
Yeah there's no going back
You're all alone

When there's no where to go from here
You've been down every road
The smoke never clears
You're waiting for signs to appear
Now I'll be the last frontier
And take back those wasted years

Been losing the battle you wage within
Can't cut through noise inside your head
You'll rejoin the land of the living
When you let go of the things that were never yours

When there's no going back
No going home
They'll lead you on
Yeah there's no going back
You're all alone

When there's no where to go from here
You've been down every road
The smoke never clears
You're waiting for signs to appear
Now I'll be the last frontier
And take back those wasted years

When there's no where to go from here
You've been down every road
The smoke never clears
You're waiting for signs to appear
Now I'll be the last frontier

When there's no where to go from here
You've been down every road
The smoke never clears
You're waiting for signs to appear
Now I'll be the last frontier
And take back those wasted years
