

I'm Going to Hell

Harley Poe

I believe in a god of course the source it exists
But its not the one they taught me on Sunday so you can drink m
y piss
Believe what you wanna believe just don't put that shit on me
You don't know any more than the rest of us so let it be free

The book you read is fine and so is Jesus on the cross
The cult that organized a religion and made him the boss
Mythology and history manipulating the name of the father son a
nd holy ghost
Bless the ones who kill the most

A god of war, a narcissist, angry jealous full of wrath
Born of sin and adamant, worship him and take a bath
But you don't get to talk to him or to ever see his face
The devil, he has blinded us and wants to fuck the human race

Do you even know what you believe can you explain to me
Without sounding like an idiot full of hypocrisy
I didn't think so, its absurd what you choose to call Gods word
Common sense and truth and logic wont stop you from being deter
ed

So love your enemy and I promise I'll do the same for you
Understand and tolerate those who haven't got a clue
But know indeed we can agree but only time will tell
And if your right and I am wrong well I guess I'm going to hell
...
