This Love

Harrison Storm

Quietly I fall into the stars when you're around
Every part of me I know is caught in what we've found

Something so real
Something like this
Something so rich
Something like this

And oh
I'm running around for this love
I know
I'm running around for this love
For this love, for this love
I'm running around for this love
For this love, for this love
I'm running around for this love

Lately I feel the spark I knew come racing back to me
Patience I confide in helps the spinning of my key

Something I've missed
Something like this
Something so rich
Something I've missed

And oh
I'm running around for this love
I know
I'm running around for this love
For this love, for this love
I'm running around for this love
For this love, for this love
I'm running around for this love

And I know it seems hard
And you feel all alone
I can help you make it feel alright darling

And I know that it seems dark
You're not here on your own
I'll hold you till we make all feel right darling

And oh
I'm running around for this love
I know
I'm running around for this love
For this love, for this love
I'm running around for this love
For this love, for this love
I'm running around for this love
