

Yellow Lights

Harry Hudson

Don't cut the lights
Just take it slow
We're moving fast
We've lost control
But, I feel safe with you
Love is brave, but I've been scared
I look around, see no one there
And still feel close to you
'Cause my life is like a bedroom door
Don't lead me in when you feel low
'Cause I might make a move

So what should I do in the darkness of you
When you light up my moon from July until June
What would I do if there wasn't a you
Would you sing about me like I sing about you

You're my sunshine
You're my rain
You're all I've lost
Yet all I've gained
If I must tell the truth
Hello darkness, goodbye light
I'll kiss you close and hold you tight
If that's alright with you
I'm coming back if that's alright with you
So come on back if that's alright with you

So what should I do when I'm dark and I'm blue
When you light up my room from July until June
What would I do if there wasn't a you
Would you sing about me like I sing about you

'Cause all I see are yellow lights, yellow lights, yellow lights
Meet me under yellow lights, yellow lights, yellow lights
We're burning through these yellow lights, yellow lights, yellow lights
When I'm with you

What should I do in the darkness of you
When you light up my moon from July until June
What would you do if I died before you
Would you sing about me like I sing about you
