

So you were right
There's always two
The one who stays, and the one who's leaving you
Hear me out, my apologies
'Cause I'm not here for sympathy

'Cause I don't want to hear about him
How he's holding you better at night
And I don't want to hear about him
In these songs you continue to write
I was with you when you wrote that line
It was me that you had on your mind
So I don't want to hear about him

That nice dress in my wildest dreams
Lipstick stains you left still on my sheets
When I hear "amazing eyes"
It breaks my heart every time

'Cause I don't want to hear about him
How he's holding you better at night
And I don't want to hear about him
In these songs you continue to write
I was with you when you wrote that line
It was me that you had on your mind
So I don't want to hear about him

Do you know what it's like to fall in love from the outside
And I don't know but I've been trying for you, for me
Now I know what it's like to fall in love from the outside
I...

So I don't want to hear about him
How he's holding you better at night
I don't want to hear about him
And these songs you continue to write
I was with you when you wrote that line
It was me that you had on your mind
I don't want to hear about him

Is he holding you better at night?
Is it me running into your mind?
I still think about you all the time
