

# Taste Back

Harry Styles

Not quite "here we go again"  
But how've you been?  
Always been a consequence  
When you call me baby  
You on white, so sweet and sour  
Just like old times  
Dinners with your high school friends  
And your favorite pastries

Must be lonely out in Paris if you talk like that  
It was tough with the time, but you called me back  
And you know that you can tell me, I can take that  
Did you get your taste back?  
Or do you just need a little love?  
You just need a little love  
You just need a little love  
You just need a little love  
Need a little love  
So you  
Did you get your taste back?  
Or do you just need a little love?

Talk in tongues, no common sense  
Like two old friends  
Where'd you find the confidence to call me baby?  
Is this you settling in?  
You drinking again  
Handling it like a European  
Is this you settling in  
You starting again, handling it?

Must be lonely out in Paris if you talk like that  
It was tough with the time, but you called me back  
And you know that you can tell me, I can take that  
Did you get your taste back?  
Or do you just need a little love ?  
You just need a little love  
You just need a little love  
You just need a little love  
Need a little love  
So you  
Did you get your taste back?  
Or do you just need a little love?

Did you-?  
Did you-?  
Did you-?  
Did you-?

Must be lonely out in Paris if you talk like that  
It was tough with the time, but you called me back  
And you know that you can tell me, I can take that  
Did you get your taste back?  
Or do you just need a little love?  
You just need a little love  
You just need a little love  
You just need a little love

Need a little love  
So you  
Did you get your taste back?  
Or do you just need a little love?
