Twin

Hatchie

The more that I've got
The more that I wonder
Stars in your eyes
A salty kiss slumber

And I keep on tracing the sand back to you
And I keep on chasing all that I knew
Before there was you
Before there was you

Slow came the night
The night that you pulled me under
Drenched in your light
Didn't take much to surprise
You didn't know me at all
Wrapped in your arms all night long
A love that lives within a song

All that I see
All that I plunder
That's all I need
To you I surrender

And I can't get closer
Closer to you, closer to you
Before I met you

Slow came the night
The night that you pulled me under
Drenched in your light
Didn't take much to surprise
You didn't know me at all
Wrapped in your arms all night long
A love that couldn't last another song

All that I see, all that I need
All that I see, all that I need
All that I see, all that I need
All that I see, all that I need
All that I see, all that I need
All that I see, all that I need

You didn't know me at all
Wrapped in your arms all night long
A love that couldn't last another song
