

# The Stygian Deep

Hate Eternal

Darkened regions of the sea  
Engulfed in blackness of the ancient sky  
I must travel through the realm  
Of tenebrous depths  
Amidst the darksome empire

Lost of all illuminated sight  
Aloft amongst the waves of torrid fray  
Wandering undaunted, thousands fathom deep  
Amidst tumultuous clouds of flame

The stygian deep  
Thus his curse has now fallen  
As you ascend into glorified lands  
Whilst I descend into ominous black  
The stygian deep  
Entrenched in overwhelming ire  
Enameled by fury and destructive rage  
Whilst I drown in absolute madness

Rise, infernal serpent of the sea  
Embrace me as I fall into  
The darkest of the dark  
Transport me, hand in hand, on my path  
Into my dreamlike state  
Of my outer body being

Drowning waters of the 'mare  
Blinded in the shadows of the dim abyss  
I must venture through the somber  
Caliginous depths amongst  
The sullen empire

Lost within the arms of endless dark  
Afloat upon the swell of heaving surge  
Sweeping undulating drift  
Amidst tumultuous waves of flame

The stygian deep  
Thus his curse has now fallen  
As you ascend into glorified lands  
Whilst I descend into ominous black  
The stygian deep  
Entrenched in overwhelming ire  
Enameled by fury and destructive rage  
Whilst I drown in absolute madness

As I look into the distance from afar  
With a broad view  
I sweep the void of influx  
Treading waters upon  
My inevitable death  
May I once again be at one  
With my predestined death (fate...)

My last breath...  
My final call...

My dying omen...  
My endless pain...
