

Straight to Your Face

Hatebreed

Straight to your face
Straight to your face
Straight to your face
With the truth

The longer it takes for you to achieve
The faster they want to see you break
It's in their nature to try to destroy
What they know they could not help create

I've seen it for years and I know first hand
Who is genuine and who is fake
The rest of the leeches will come and go
Good riddance we hated you anyway

Straight to your face
Straight to your face
Straight to your face
With the truth

Sometimes it gets hard when the road to the future
Takes you back to a better day
You wonder and ask yourself "Where the time went?
And why some people had lost their faith"

Through some memories and the friendships we had
Over time have begun to fade
We're still right here and we're stronger than ever
What we've done can never be taken away

Straight to your face
Straight to your face
Straight to your face
With the truth

Straight to your face
Straight to your face
Straight to your face
With the truth, here we go

I'm coming straight to your face
With the truth now
Straight to your face
Straight to your face

Straight to your face
Straight to your face
Straight to your face
With the truth
