

## BULLET

hatespeech (хейтспіч)

When evil comes it doesn't knock  
Nobody cares if your doors are locked  
Like a little pussy you'll be so shocked  
Gun to your head all you hear is clack  
I don't give a fuck about your sentiments  
You chose to pass - fill your testament  
The intention to attack - it is not even hidden  
So why won't you go and just fucking hit 'em

Send a bullet to the occupier  
Take your chance and kill the empire  
Take control of your desire  
Or they'll set the world on fucking fire  
Send a bullet to the occupier  
Take your chance and kill the empire  
Take control of your desire  
Or they'll set the world on fucking fire

Set the world on fucking fire  
Set the world on fucking fire  
Set the world on fucking fire  
Set the world on fucking fire

We've seen this shit many years ago  
Same fucking scenario it's just like before  
For who we are for no fucking reason  
They locked us up to rot in prisons  
They stole our freedom, took away our breath  
Those who resisted have been starved to death  
Every second the threat increases  
Your peace plan will be torn to pieces

Send a bullet to the occupier  
Take your chance and kill the empire  
Take control of your desire  
Or they'll set the world on fucking fire  
Send a bullet to the occupier  
Take your chance and kill the empire  
Take control of your desire  
Or they'll set the world on fucking fire

Set the world on fucking fire  
Set the world on fucking fire  
Set the world on fucking fire  
Set the world on fucking fire
