

# Floating

Have Mercy

I am here, grab ahold  
Hold your head, stay afloat  
Pull me into your heart  
Keep me right where you are

I hurt so much I've been floating here so long  
And every time I start to sink you come along

And say you love me again  
You just don't know how it happens  
Maybe I'll see you one day  
In the street and we both feel the same  
But don't give me hope  
For things you don't see in the future  
Just let me go  
I won't remember your name  
I won't remember your name

It's been too long since I had  
A good thought, trace it back  
To a place or a time  
Somewhere I call you mine

I hurt so much I've been floating here so long  
And every time I start to sink you come along

And say you love me again  
You just don't know how it happens  
Maybe I'll see you one day  
In the street and we both feel the same  
But don't give me hope  
For things you don't see in the future  
Just let me go  
I won't remember your name  
I won't remember your name  
I won't remember your name

Love me again  
Love me again  
Love me again  
Love me again

And say you love me again  
You just don't know how it happens  
Maybe I'll see you one day  
In the street and we both feel the same  
But don't give me hope  
For things you don't see in the future  
Just let me go  
I won't remember your name  
I won't remember your name
