

# Never Enough

Hawk Nelson

Some days I spend all day on the phone  
And other days I would just rather be alone  
Some days I feel like the whole world is waiting on an answer  
I've been caught under the radar so help me please  
It's been that kind of day so just go away  
And let the machine say what I want it to say  
It's never enough, it keeps getting tough  
I wanna listen to your voice but it keeps breaking up  
Some days I just don't wanna leave my home  
And other days I'm alive like a rolling stone  
Sometimes I feel so insignificant like it doesn't really even matter  
And I know that we all make mistakes  
'Cause I'm guilty as charged with a case of foot in mouth disease  
So help me see clearly as I try to just get myself to a place where my lens can adjust
