

# Between Us

Hayden James

Ooh and this could be it, this could be it  
How do you know that this is all over, this is all over  
Throw my arms in the air if this is the end, ooh  
How do you know that this is all over, this is all over

Between us  
Between us

Tell me where to begin, where to begin  
'Cause I wanna know and just start over, and just start over  
And tell me what I'll do, do, with memories of you, you  
How do you know that this is all over, this is all over

Between us  
Between us  
Between us  
Between us

Throw my arms in the air if this is the end, ooh  
How do you know that this is all over, this is all over  
And tell me what I'll do, do, with memories of you, you  
How do you know that this is all over, this is all over

Between us  
Between us  
Between us  
Between us  
How do you know that this is all over, this is all over  
Between us

Between us  
Throw my arms in the air  
Between us  
Throw my arms in the air  
Throw my arms in the air  
Can you give me something, fill the space between us

It's not enough, it's not enough (oh)  
Can you give me something, fill the space between us  
It's not enough, it's not enough (oh)  
Can you give me something, fill the space between us

Between us  
Between us  
Between us  
Between us  
How do you know that this is all over, this is all over

Give me something, give me something, oh  
It was you and me (you and me) I know  
Give me something, give me something, oh, ooh...  
It was you and me (you and me) I know
