

We Could Be Love

Hayden James

I see you now
Bright like the stars
Yeah here in the dark
Where we could be love
Follow the sound
Sound of my heart
And just one more time
Yeah we could be love

I see you now
Bright like the stars
Yeah here in the dark
Where we could be love
Follow the sound
Sound of my heart
And just one more time
Yeah we could be love
Yeah we could be love

We could be love

I see you now
Bright like the stars
Yeah here in the dark
Where we could be love
Follow the sound
Sound of my heart
And just one more time
Yeah we could be love

Won't you stay here with me
I'll take you to the ceiling
I'll get you hooked up on the feeling
Give me the chance to show

It's a quarter to three
I'm calling as you're leaving
Full technicoloured dreaming
I just want you to know

I see you now
Bright like the stars
Yeah here in the dark
Where we could be love
Follow the sound
Sound of my heart
And just one more time
Yeah we could be love
Yeah we could be love

Yeah we could be love

We're closing our eyes
And kissing the skies
We feel alive
We feel alive

We're closing our eyes
And kissing the skies
We feel alive
We feel alive

I see you now
Bright like the stars
Yeah here in the dark
Where we could be love
Follow the sound
Sound of my heart
And just one more time
Yeah we could be love
Yeah we could be love

We could be love

I see you now
Bright like the stars
Yeah here in the dark
Where we could be love
Follow the sound
Sound of my heart
And just one more time
Yeah we could be love
Yeah we could be love
