

Wide Eyes

Hayden

I'm getting off at the next stop
Will you leave with me so that we can be seen
By my old love who's standing over there
She left me so stunned, that I walk around scared
wide eyes, I think that I've seen you
And I need you to do this for me
Wrap both of your arms around me, and act like I'm all that you
need
and so it went like that and she agreed to get off
With me by her side
Three blocks from her stop
And we stepped to the street and she kissed my cheek
And whispered words that I won't repeat
wide eyes, I think that she saw us
But I didn't look up to see
Wrap your warm arms around me
And let's go get something to eat
