

The Edge Of Love

Hayley Westenra

There's been a change
In who we are
It seems to me
That this could be
The edge of love

It's rather strange
To come so far
And never show
Or even know
That this was love

But now it's different
Yet we're the same
It's you and I
Just you and I

We're still the fools
They warned us of
But now I know
We're on the edge of love

And in a while
We'll realize
We've chanced upon
We've danced upon
The edge of love

It's in your smile
It's in your eyes
The gentle fire
The true desire
It must be love

There's no returning
From where we came
It's you and I
Just you and I

We're still the fools
They warned us of
But now I know
We're on the edge of love
