

All Circles

Hayley Williams

All circles presuppose they'll end where they begin
But only in their leaving can they ever come back around
All circles presuppose they'll end where they begin
But only in their leaving can they ever come back around
All circles presuppose they'll end where they begin
All circles presuppose they'll end where they begin
But only in their leaving can they ever come back around
All circles presuppose they'll end where they begin
But only in their leaving can they ever come back around
All circles presuppose they'll end where they begin

All circles begin with an end
They come back around
They come back around again

All circles presuppose they'll end where they begin
But only in their leaving can they ever come back around
(All circles presuppose they'll end where they begin
But only in their leaving can they ever come back around)
