

First World Problems

Hazlett

Home to town
Fingers and bones
Fingers and bones

Hostile crowd
Raged on my own
Train on my own

Lost the shape in my eyes
My face is glowing
Glowing
No power made me realise
My face is glowing

So rinse these hearts
From their first world problems
Rinse these hearts
From their first world problems

Sharing space
Inhale air, alien air
Plead my case
It's creepy to care
But I don't care

Lost the shape in my eyes
My face is glowing
Glowing
No power made me realise
My face is glowing

So rinse these hearts
From their first world problems
Rinse these hearts
From their first world problems

No one says hello
No one says hello
No one says hello
No one says hello

So rinse these hearts
From their first world problems
Rinse these hearts
From their first world problems

No one says hello
No one says hello
No one says hello
No one says hello
