

Just keep on driving
I'm counting the lines 'til we meet
You know I've got it bad

Keep watching the water
It's filling the holes in the street
I'll swim if I gotta
It really ain't that big a feat

You know I've got it bad
I'll do what I've got to
I've got it real bad
Just to get to you

There's no map here to show me the way
Just the memories I see everyday
You're the "X" marks the spot
But you're hidden away
In ancient geometry

You took a gamble
When you left
The city in shambles at my feet
Well I'm no safe bet
But I bet you knew that
The puzzle's been scattered
And it's left my hopes and dreams all shattered
Now I'm collecting every piece

You know I've got it bad
I'll do what I've got to
I've got it real bad
Just to get to you

There's no map here to show me the way
Just the memories I see everyday
You're the "X" marks the spot
But you're hidden away
In ancient geometry

Guess you never thought I'd put the pieces back together
Guess you never thought I'd make it out from underneath your weather
Guess you never met a hunter, baby I can hunt you better
Now I'm picking up your scent and getting closer now than ever

Just hold on
Hold on
It won't be long 'til the land is gone
If you can't float and I can't sink
You should have taken time to think

Guess you never thought I'd put the pieces back together
Guess you never thought I'd make it out from underneath your weather
Guess you never met a hunter, baby I can hunt you better
Now I'm picking up your scent and getting closer now than ever

Just hold on

Hold on
It won't be long 'til the land is gone
If you can't float and I can't sink
You should have taken time to think

Just keep on driving and counting the lines in the street
I woke from the lightning
How funny it's all just a dream

Guess you never thought I'd put the pieces back together
Guess you never thought I'd make it out from underneath your weather
Guess you never met a hunter, baby I can hunt you better
Now I'm picking up your scent and getting closer now than ever
